CENTER

**Education  
Strategy &  
Execution  
Plan**

# **Education Objective:**

Teach students to have an authentic and balanced self identity, inside and outside the Masjid, leveraging various tools rooted in mercy and kindness on a solid Islamic foundation.

# The problem our community faces

Our children are facing a real identity issues

Our children are influenced everyday in many different aspects of their lives by falsehoods & distractions that make negative lifelong impressions

Many of our children focus on only one Islamic education stream and neglect the others. For example: memorizing the whole Qur'an is not always coupled with learning the true Islamic etiquettes and lessons contained in the Qur'an

Our children are in dire need of being taught a balanced Islamic education which will ultimately lead to their success in this World and the Hereafter
